1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 21-34, drawn to a window unit, classified in class 52, subclass 306.
  - II. Claims 28-34, drawn to a method, classified in class 052, subclass 747.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP§806.05(h)). In the instant case the window unit of Group I could be used in a process which does not require bonding it to a surrounding structure.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to David Beto on 11/06/05 to request an oral election to the above restriction requirement, but did not result in an election being made. The

Art Unit: 3635

examiner was informed that Mr. Beto was deceased and that another attorney handling the application would return the examiners call. No return call was received.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6840. The examiner can normally be reached on M-Th.
